Aetna Open Access[®] Elect Choice[®] Plan

www.aetna.com

It's time to start comparing health insurance plans

Here's one that lets you visit any doctor in the Aetna network. And you do not need a referral when you visit one.

You don't have to choose a **primary care physician (PCP)*** either, but you may want to. That's because PCPs do more than give you a checkup. They know you, your medical history, and they can help guide you and direct your care.

The plan also gives you access to tools, tips, programs and services. Use them. They can help you find network doctors, estimate costs and more.

Looking for your exact copay amounts? Or what your plan covers and doesn't cover?

This booklet gives a general idea of how your Aetna health plan works and how to get the most out of it.

For plan details like copays and what's covered, check your Plan Design and Benefits summary. This should be in your enrollment kit. Ask your employer if you do not have one.

The options	Pick your doctor	How it works
Your network PCP	Choose any PCP from Aetna's network. Again, choosing one is not necessary, but you might find it helpful to have one. You can change your PCP anytime. Just call Member Services at the number on your Aetna ID card. Or do it online through your secure member website.	Your PCP will: <ul style="list-style-type: none">• Give you checkups or treat you when you are sick or hurt• Get approval from us before giving you certain services**• File claims for you With this option, you typically pay less out of your pocket.
Any network provider	Visit any network doctor or specialist without a referral. Network doctors <i>contract with Aetna to offer rates that are often lower than their regular fees.</i> A specialist is a doctor who focuses only on treating certain conditions or diseases. For example, a dermatologist treats skin conditions. A cardiologist treats heart problems.	The network doctor or specialist will: <ul style="list-style-type: none">• Provide care• Get approval from us before giving you certain services**• File claims for you With this option, you typically pay more out of your pocket.
You must see network providers for the plan to cover and help pay for care. Providers are professionals and facilities that provide health care services. Doctors, hospitals and labs are examples of providers.		

*In Texas, PCP is known as physician (primary care). In the State of Washington, PCP refers to primary care provider.

**In Texas, this approval is known as "pre-service utilization review" and is not "verification" as defined by Texas law. In case of emergency, call 911 or your local emergency hotline, or go directly to an emergency care facility.

Health insurance plans are offered, underwritten and/or administered by Aetna Life Insurance Company (Aetna).

Questions? Give us a call.

When you have a coverage question, Member Services is ready to take your call. The toll-free number is on your Aetna ID card.

Or use our automated phone system. You can order an ID card or ask for a claim form and mailing address. The system works with your voice and your phone's touch tone (when you need privacy).

You're mobile — so are we.

So use your smartphone when you're on the go.

***Estimated costs not available in all markets. The tool gives you an estimate of what you would owe for a particular service based on your plan at that very point in time. Actual costs may differ from the estimate if, for example, claims for other services are processed after you get your estimate but before the claim for this service is submitted. Or, if the doctor or facility performs a different service at the time of your visit.
